

Secure/Commercial **ULTRA MINI-MATRIX** KVM SWITCHES

Streamline operations across multiple networks with the functionality of a KVM switch, scaler, and multiviewer in a single powerful solution.

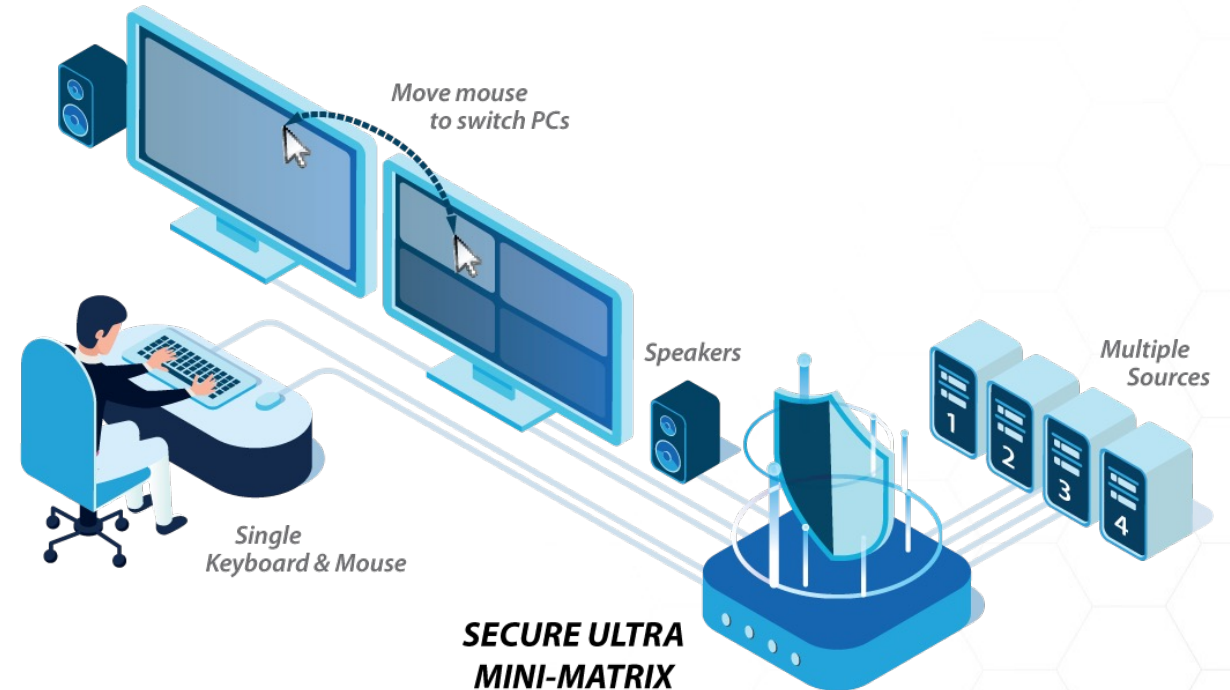

HLT37160 Rev 1.2

INTRODUCING THE **ULTRA MINI-MATRIX**

The **Ultra Mini-Matrix** empowers you with multi-viewing and scaling functionalities, consolidating and arranging multiple sources onto a single or dual screen display while maintaining absolute data separation, preventing any information from crossing over.

It's the ultimate solution for executive offices, meeting rooms, and operation centers, empowering users with seamless and secure access to critical information, displaying information from multiple sources simultaneously on one or two display screens .

ULTRA MINI-MATRIX KEY FEATURES

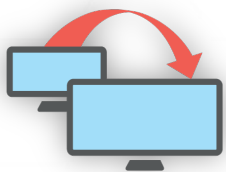

- The Ultra Mini-Matrix is a **NIAP PP4.0 compliant**¹ KVM switch with Multiview functionality.

*NIAP PP4.0 certification for PSD coming soon

- Securely¹ view all computer sources on up to **two 4K displays** in various layout presets.

- An **Autoscaler** adjusts the incoming display resolution to match the selected Multiview layout preset.

- Easily **switch controls between devices** by dragging the cursor across the border.

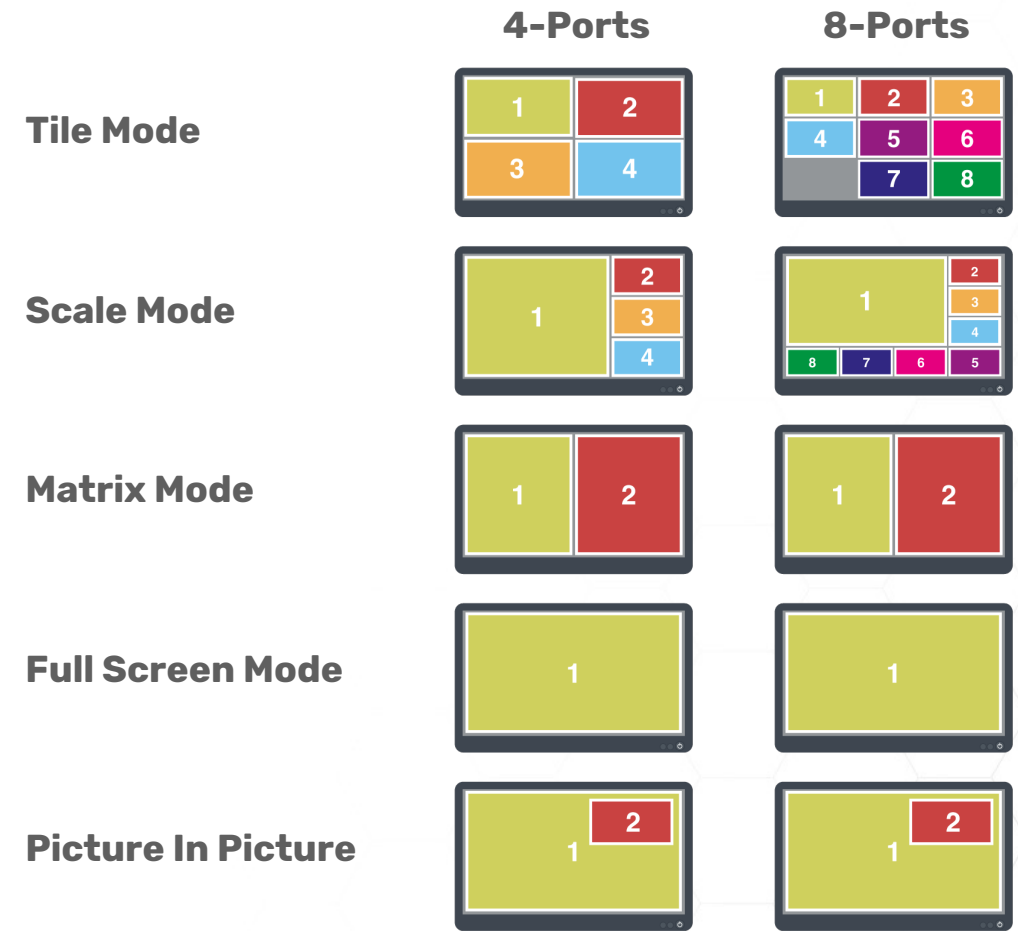

¹ Applies to secure models only.

MULTIVIEW

SINGLE DISPLAY LAYOUT PRESETS

The Ultra Mini-Matrix is equipped with a range of built-in Multiview presets, designed to maximize the operator's situational awareness.

Presets are selected using either keyboard hotkeys or via an external remote control.

MULTIVIEW

DUAL DISPLAY LAYOUT PRESETS

Tile Mode

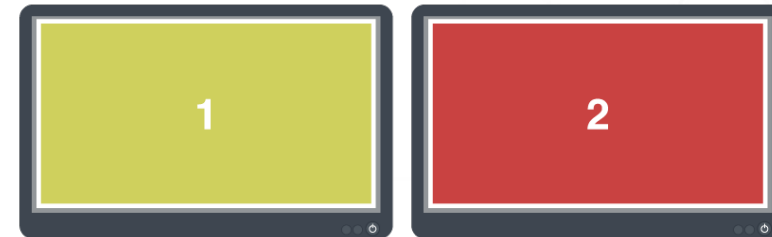

Scale Mode

Matrix Mode

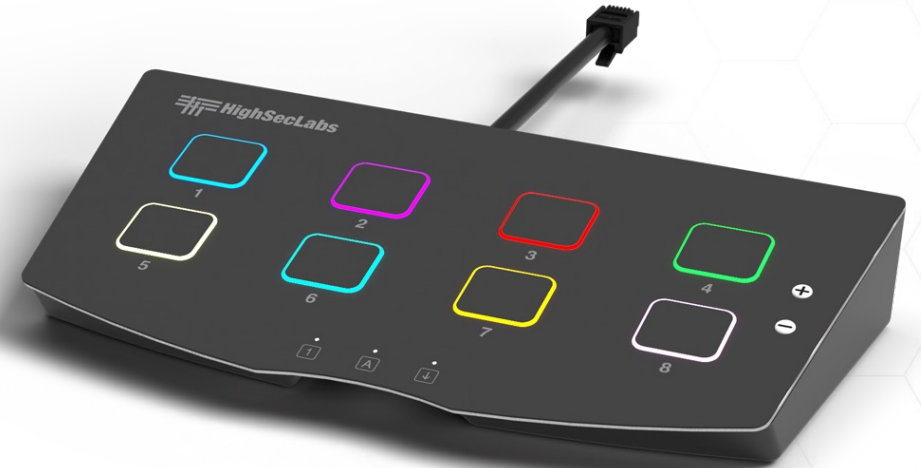

8-Ports

REMOTE CONTROL

The Ultra Mini-Matrix is compatible with HSL's 8-button programmable remote-control Unit (RCU).

- The RCU sends RS-232 commands to the Ultra Mini-Matrix, instructing it to perform functions such as:
 - ✓ Switch channels
 - ✓ Select display presets
 - ✓ Enable or Disable Picture-in-Picture
- One RCU can cascade into another, doubling the number of available functions.

LAYOUT CUSTOMIZATION ON-SCREEN DISPLAY

- The Ultra Mini-Matrix features an On-Screen Display (OSD) interface for easy customization of the following settings:
 - Video options
 - Channel display
 - Mouse controls
 - Audio mixing and volume
- The OSD uses intuitive menus to help create an optimal setup.
- The OSD can be accessed at any time via keyboard hotkeys.

SECURITY FEATURES (SECURE MODEL)

Filtered USB Security

- Whitelist or blacklist any USB device by its VID/PID to block unauthorized access, while pre-authorizing authentication devices (CAC) by default.

Video Security

- Prevents video signal leakage and display manipulation by using complete electrical isolation between inputs and dedicated, read-only EDID emulators that block any potential data path from the display back to the computer.

Audio Security

- Enforced unidirectional audio flow prevents repurposing speakers as microphones.

Keyboard & Mouse Security

- Enforces a secure, one-way data flow from peripherals to each computer using optical data diodes and dedicated USB emulation, blocking all reverse communication and non-HID data.

Anti-Tampering Assurances

- Security seals on the device and packaging reveal attempts to compromise the device.

Built for Trust

- The Ultra Mini-Matrix is **TAA/BAA compliant** and is produced using a secure supply chain.

COMMERCIAL FEATURES

Cross-Device Copy & Paste

- Copy & Paste text and files across devices as if they were the same device.

Mic Input (4-Port model)

- Share a single mic input with all 4 connected computers.

USB Connectivity

- Connect USB (3.0 Type A) devices to the user console.
 - 4-Port: Up to 4 connections
 - 8-Port: 1 connection
