

Quick Installation Guide

PortFix Cable Support Brackets

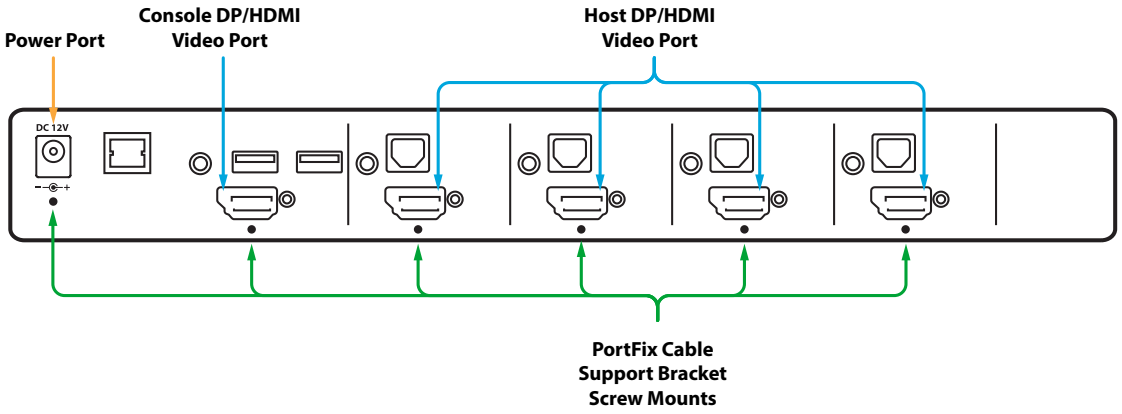

Objectives

HighSecLabs' PortFix cable support brackets keep video and power cables secure in HSL products. This lets users install the product in more convenient configurations without the risk of cables being pulled loose.

The support brackets are designed to be screwed into the back panel of an HSL product, using the dedicated screw mounts as shown below.

IMPORTANT NOTE: PortFix screw mounts are included on the back panel of newly constructed HSL products. Older products do not include these screw mounts; DO NOT attempt to install support brackets on products without the dedicated screw mounts.

EXAMPLE: SK41PH-4 – 4-Port KVM Switch

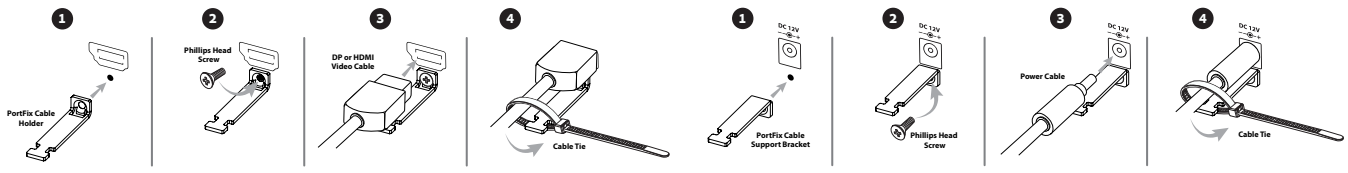

Installation

Secure a DisplayPort or HDMI Cable to the DP/HDMI Port:

1. Align the PortFix cable support bracket to the screw mount on the product's back panel, with the long tab facing downwards.
2. Screw the support bracket in place with the included Phillips-head screw.
3. Insert the DP or HDMI video cable into the DP/HDMI combo port.
4. Thread a cable tie through the notches on the support bracket's long tab and secure the cable.

Secure a Power Cable to the DC Power Port:

1. Align the PortFix cable support bracket to the screw mount on the product's back panel, with the long tab facing upwards.
2. Screw the support bracket in place with the included Phillips-head screw.
3. Insert the power cable into the DC power port.
4. Thread a cable tie through the notches on the support bracket's long tab and secure the cable.
